Art Unit: 1616

The election of species requirements are withdrawn. Per MPEP 821.04, claims 67-98, directed to a method of making the elected composition are rejoined.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 67-132 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-6, 12-15 of U.S. Patent No. 6,342,250 in view of McKnight et al (US 3,800,292).

McKnight et al teach a collagen film comprising impregnated silver for treatment of burn wounds.

It would have been obvious to one of ordinary skill to add silver to the method claims of US '250 and method to achieve the beneficial effect of making a treatment of burn wounds in view of McKnight et al. The patented claims encompass the scope of the active agents claimed in the instant claims.

Art Unit: 1616

Claims 62, 89, 90 are objected to because of the following informalities: In line 3 of the claims, "sebacic acid" is a monomer rather than a polymer. Appropriate correction is required.

The disclosure is objected to because of the following informalities: On page 48 lines 10-16, polycyanoacrylates is misspelled, "isobutyl based" is indefinite, and sebacic acid, 2-hydroxyethyl methacrylate, 1,3-bis (carboxyphenoxy)propane, vinyl isopropyl styrene and vinyl pyrrolidine refer to monomers rather than polymers,

Appropriate correction is required.

No claims allowed.
